

Bluetooth Smart heart rate

Heartrate available within an extreme wide range

Original
Quality
Option

Heartrate available within an extreme wide range

This option gives the heart rate in beats per minute on the display of the control unit and offers the possibility of heart rate controlled testing or exercising on all treadmill models and ergometers. Thanks to the bluetooth, the heart rate can be received over a long distance, up till 10 meters, without interference. The test person wears a belt with a sensor. It can only be ordered in combination with the (Programmable) control units with touchscreen (945814/5 and 945834/5). This option includes 1 belt. Please note that this option is NOT suitable for triggering of Blood Pressure measurement. If you want to measure the HR in combination with the BP, you can use the HR signal of the custom pack (#945888). The Bluetooth HR option is not possible then.

High standards

Lode is a socially and environmentally responsible company. All Lode products are RoHS/WEE compliant and Lode is ISO 9001:2015, and ISO 13485:2016 certified. All medical products comply to MDD 93/42/EEC, incl. IEC 60601-1.
